MEET THE MEMBERS

GLEN & ELIZABETH PACKARD

It was a warm night in August 1966 in Santa Maria, California, when an 18 year old blue eyed blonde, who was “cruising the drag” with her best friend, stopped to talk to a red headed 19 year old from Wisconsin who was stationed at the nearby Air Force base. Little did she know how meeting this self proclaimed “car nut” would change her life.

In the 70’s we built and raced our own late model stock car at local tracks in California. When that became too expensive we bought a muscle car. In the late 80’s Glen rebuilt the engines of our teenage sons’ Nova and Chevelle to allow them to compete at the local drag strip. In the 90’s we were back to muscle cars. Finally, in 2001, Glen bought his long awaited dream- his first Corvette.

We are avid NASCAR fans as well as attending races weekly at several of the local tracks. I have spent more hours sitting on a bleacher seat than many people spend sleeping. Glen has jogged for over 40 years to stay in shape. During the fall he spends many hours pursuing his other passion, bow and rifle hunting. I love to tend to my flowers and do anything that has to do with crafts, especially stamping cards. Weather permitting I try to continue with my walking program.

We will be married 42 years this October and have two sons who are married, two children each (one set of twins). Although they both live out of town we are a close family who spend time together as often as we can. And *CARS* is always one of the topics you will hear us talking about.

After joining Mad City Vettes I found out there are other “car nuts” out there, although I still would rank Glen near the top. We have met many new friends with our same interests through the club. We love to go on the organized cruises through the local countryside. We are looking forward to the 2009 activities; especially the celebration of the 10th anniversary of Mad City Vettes.
